

# Wall-Mount Installation for Office UPS

Smart Power introduces the wall-mountable Office UPS for custom installations

The Office UPS can now be installed on walls or other flat surfaces in those environments where space is limited

**Benefits:**

- Saves space
- Optional "EIB" (Easy Installation Bracket) protects walls from unnecessary damage
- Easily secures to surface where monitoring lights can be observed

No more measuring confusion. The optional "EIB" lets you mount your Office UPS without the use of rulers, making the installation a snap.
