

Smart Power introduces the wall-mountable POS Guardian for custom installations

The POS Guardian can now be installed on walls or other flat surfaces in those environments where space is limited

Benefits:

- Saves space
- Optional (Patent Pending) "EIP" (Easy Installation Panel) protects walls from unnecessary damage
- Easily secures to surface where monitoring lights need to be observed

No more measuring confusion. The optional "EIP" lets you mount your POS Guardian without the use of rulers, making the installation a snap.
